1. The following is an examiner's statement of reasons for allowance:

The present invention pertains an error correction method. The prior arts do not teach the combination of features of adding an inner parity (PI) of  $e$  bytes per  $x$  segment and an outer parity (PO) of bytes to an error correction block having a size of  $n$  bytes in a row direction  $X$  ( $m \times o$ ) bytes in an column direction, and providing the PI of  $e$  bytes for each of the plurality of PI blocks to the PI direction of the error correction block wherein  $f$  which is a number of PO direction parities, and  $x$ , which is a number of PI direction segments, are provided so that a result of multiplication of  $x$  with  $f$  is divided by  $o$ , which is a number of data frames in the error correction block, without a remainder, and a recording frame is formable where  $f$  is not equal to  $o$ . Hence, the prior arts of record do not anticipate nor render obvious the claimed inventions. Thus claims are allowable over the prior arts of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christine T. Tu whose telephone number is (571)272-3831. The examiner can normally be reached on Mon-Thur. 8:30am-6:00pm.
